I am a 5th-semester Information Systems student at Gunadarma University with a GPA of 3.56, aspiring to build a career in technology-driven fields such as Data Analysis, Web Development, or Programming. My academic journey and personal projects have equipped me with relevant skills, including proficiency in programming languages like Python, Java, C++, and JavaScript, as well as experience in web development using frameworks like React, Angular, and Node.js. Additionally, I have basic knowledge of data analysis, including data visualization and statistical techniques, and experience working with databases like MySQL, PostgreSQL, and MongoDB. With a strong foundation in problem-solving, a passion for creating impactful solutions, and familiarity with tools such as Git, Docker, AWS, and Azure, I am eager to contribute to innovative projects and deliver meaningful results.

EDUCATION

Gunadarma University Bekasi, Indonesia

- Bachelor of Information Systems.
- **GPA:** 3.56
- **RelevantCoursework :** Intro HTML, CSS, and JavaScript Responsive web design Front-end frameworks (React, Angular, Vue) User interface (UI) and user experience(UX) design and Server-side programming languages (Node.js, Ruby, Java, PHP) Databases (SQL, NoSQL)
- **Basic Skill Management**
  Strong communication skills, both verbal and written.
  Ability to work under pressure.
  Quick learner and highly adaptable.
  Customer satisfaction-oriented

PROJECT

Collage Lifehack

- During my studies, I successfully developed a web application called 'College Lifehack' using HTML, CSS, SQL, and PHP. This project, assigned by my professor, aimed to provide students with easy access to course materials tailored to their specific majors, such as Information Systems. By accomplishing this project with a perfect score, I demonstrated my ability to design, develop, and deploy a functional web application.

Alumni Management System

- This system has successfully improved alumni engagement with the university. Through notification features, alumni are always informed about university activities and can actively participate in various events.

Zen Healt – UI/UX Design

- Designed an Android and iOS application prototype using **Figma**, themed around health and wellness. The application, **Zen Health**, aims to assist users in maintaining their health by providing easy access to various features such as medical consultations, fitness tracking, and personalized health recommendations. Inspired by platforms like Halodoc, the app focuses on delivering an intuitive and user-friendly interface to ensure seamless navigation. This project highlights my skills in UI/UX design, including wireframing, prototyping, and user-centric design principles, showcasing my ability to create solutions that cater to real-world needs.

ORGANIZATIONAL EXPERIENCE

Member – Google Developer Group (GDG)

- Actively participate in GDG events and workshops to enhance technical skills and stay updated on the latest trends in software development.

- Collaborate with a community of developers to share knowledge, build projects, and contribute to open-source initiatives.

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, C++, JavaScript, etc.
- **Databases:** MySQL, PostgreSQL, MongoDB, etc.
- **Frameworks:** Django, React, Angular, Node.js, etc.
- **Tools:** Git, Docker, AWS, Azure, etc.
- Proficiency in Microsoft Office (Word, Excel, PowerPoint).
- Beginner in UI/UX Design
